Introducing the AquaSolus Collection

AquaSolus is redefining luxury, wellness, and relaxation with its new collection of premium hot tubs and swim spas.

Inspired by the natural elements of water, simplicity, and balance, each model in the AquaSolus series is designed to elevate your relaxation experience, offering the perfect blend of elegance and wellness.

The collection features three distinct Series—**AquaPure**, **NaturaBalance** and **AquaLux** as well as **Swim Spas Series** and **Vacation Series** — each tailored to meet your specific needs, from simplicity and harmony to ultimate luxury.

The AquaSolus Difference

Innovation At The Forefront

We have raised the bar with leading technologies and design to ensure every detail was considered throughout the design process. From the curvature of the acrylic to the seats that sculpt and shape around your body, to the carefully positioned jets, and the purification system—we thought of it all.

Quality you can trust

Each AquaSolus spa is meticulously designed with the highest quality components and features to deliver lasting relaxation and revitalization, both now and for years ahead. Discover the iconic massage, effortless water care, exceptional energy efficiency, and world-class customer support.

Through cutting-edge innovation, superior craftsmanship, and a commitment to wellness and vitality, we continue to set the standard for excellence.

Exceptional Craftsmanship

We take immense pride in every hot tub we create, with each one meticulously handcrafted during production. Our dedicated team pays close attention to every detail, ensuring that each component meets our stringent quality standards. We harness the latest technology to uphold our commitment to excellence.

Every spa features a stainless-steel structure, complemented by a meticulously hand-sprayed and hand-rolled fiberglass finish. Our plumbing is expertly assembled by hand, with fittings manually glued and secured. Additionally, many jet holes are either hand-drilled or precision-cut. While every hot tub reflects our unwavering commitment to quality, each one is uniquely crafted, making it a truly custom masterpiece.

Wellness At The Core

Wellness is at the heart of AquaSolus. Our hot tubs offer more than just relaxation—they promote overall well-being, stress relief, and renewed vitality. Experience the therapeutic warmth and rejuvenating hydromassage, whether enjoying peaceful solitude or quality time with loved ones, for a healthier, happier you.

The Ultimate Wellness Experience

Introducing the AquaSolus Collection—a fusion of luxury, wellness, and design that elevates both your lifestyle and living space. This range of hot tubs and swim spas is crafted for those who value form as much as function, combining cutting-edge hydrotherapy with sleek, modern aesthetics to create a stunning focal point in any garden or home. AquaSolus is designed not only to enhance your physical well-being but to integrate seamlessly into your décor, offering the perfect balance of relaxation, fitness, and contemporary design.

Wellness, Redefined

AquaSolus redefines wellness by blending therapeutic hydrotherapy with high-performance aquatic exercise, making it ideal for relaxation and fitness alike. Strategically placed jets target key muscle groups, easing tension and relieving stress, while the soothing warm water improves circulation, reduces inflammation, and alleviates chronic pain. Whether recovering from a workout or seeking to unwind after a busy day, AquaSolus is your personal sanctuary of wellness, providing a space for rejuvenation and low-impact exercise, tailored to your needs.

Built for Performance, Designed for Life

AquaSolus is designed for high performance and superior comfort, whether you're enjoying a relaxing soak or a vigorous full-body workout. The adjustable turbine systems in our swim spas offer customisable resistance, simulating open-water swimming for effective, low-impact exercise. Both the hot tubs and swim spas are engineered with performance in mind, yet their sleek, contemporary designs ensure they fit seamlessly into modern living spaces. AquaSolus combines functionality with beauty, delivering exceptional performance while enhancing the aesthetic of any home or garden.

A Sanctuary for Mind and Body

More than just physical wellness, AquaSolus offers a retreat for the mind. With mood-enhancing lighting and optional soundscapes, it creates an immersive, calming environment that helps reduce anxiety, improve sleep, and promote mental clarity. AquaSolus is not just about relaxation—it's about creating a peaceful, design-led space that nurtures your well-being and elevates the look of your home with timeless, contemporary style.

AquaStyles: Where Design Meets Wellness

At AquaSolus, we believe a hot tub should be more than just a wellness experience—it should be a statement piece in your outdoor space. That’s why our AquaStyles cabinet is crafted with the same attention to detail as fine furniture, featuring sleek, horizontal slats that bring a contemporary edge to any setting. Whether nestled into a modern garden or a chic patio, the AquaStyles design effortlessly blends with your surroundings.

Made from high-quality, weather-resistant synthetic materials, our cabinets are built to withstand the elements—be it rain, snow, or sun—ensuring they look flawless season after season. With minimal maintenance required, simply rinse with soapy water to keep your hot tub looking as fresh as the day it arrived. AquaStyles is where durability meets timeless design, creating a seamless fusion of style and functionality for your outdoor living space.

AquaSounds

Enhance your spa experience with AquaSounds, our cutting-edge Bluetooth audio system designed for ultimate relaxation. Control it effortlessly through a touchscreen or your mobile device. With AquaSounds, you can escape into a world of soothing sounds that surround you as you unwind.

AquaSounds delivers exceptional sound quality, thanks to its four advanced components. The Bluetooth system, and powerful on spa speakers. The unique design of the AquaSolus range.

AquaSounds comes standard with all AquaSolus hot tubs—because we believe premium audio should be included, not an upgrade.

AquaSolus EcoPure: The Key to a Perfect Soak

At AquaSolus, we know that crystal-clear water is essential to enjoying your hot tub experience. While design features like jet count, pump size, or acrylic colour are important, nothing compares to the comfort of bathing in pristine, perfectly maintained water.

That’s why AquaSolus has redefined water management with the EcoPure system. This innovative technology ensures your hot tub delivers the ultimate relaxation experience, while minimising chemical use. Combining high-flow circulation, advanced filtration, and a patented ozone system, EcoPure guarantees superior water quality every time you step in.

With EcoPure, you’ll experience cleaner, fresher water, so you can relax in comfort knowing your hot tub is performing at its best.

Unmatched Efficiency

EcoPure isn’t just about water clarity—it’s about efficiency. Our expertly engineered SW pumps move more water with less energy, offering outstanding performance in a compact design. With efficiency ratings of up to 90%, EcoPure ensures your hot tub runs smoothly and economically, saving on both energy and maintenance.

How Does EcoPure Work?

The AquaSolus EcoPure system is built on simplicity and natural principles, ensuring superior water clarity through continuous movement and controlled purification. EcoPure filters an impressive 3,780 US gallons of water per hour—meaning an average-sized hot tub (317 US gallos) is purified 12 times an hour.

With complete control over EcoPure’s 24-hour filtration schedule, you can customise the system to meet your specific needs. By reducing bacteria build-up, the filtration system helps lower chemical use, while our patented ozone technology produces long-lasting purifying ozone for a cleaner, healthier soak.

Environmentally Friendly and Effective

EcoPure doesn’t just keep your water clear—it’s also environmentally conscious. Our energy-efficient SW pumps optimise water flow while reducing energy consumption, allowing you to enjoy the perfect balance of performance and sustainability. AquaSolus EcoPure gives you peace of mind that your hot tub is as good for the planet as it is for you.

AquaSolus AQ10 Insulation

AQ10 full insulation technology has become a well-established and highly popular solution in the hot tub industry, specifically designed to reduce operational costs while promoting energy efficiency and environmental sustainability. By using advanced insulation materials, this technology helps to minimise heat loss, ensuring that the water retains its warmth for longer periods, which in turn lowers the energy needed to maintain the desired temperature.

At AquaSolus, we are committed to innovation, continually pushing the boundaries of what's possible in hot tub technology. Our latest breakthrough in AQ10 full insulation goes beyond standard practices, delivering even greater energy savings. By enhancing insulation around the shell and base of the hot tub, this upgraded system reduces heat escape more effectively, meaning your hot tub works smarter—not harder—to maintain the perfect water temperature.

This significant improvement will not only lower your running costs, but also support a greener lifestyle by reducing energy consumption and minimizing your carbon footprint. With AQ10 full insulation technology, you can enjoy a luxurious hot tub experience while knowing you're making a responsible choice for both your wallet and the environment.

AquaSolus Hydrotherapy: The Science of Wellness

Hydrotherapy is one of the most compelling reasons people invest in hot tubs, and it has been central to the design of the AquaSolus range. By harnessing the therapeutic power of water, AquaSolus offers an advanced wellness experience that goes beyond relaxation.

Hydrotherapy is proven to alleviate pain and improve mobility for those suffering from chronic conditions such as arthritis, fibromyalgia, and muscle injuries. Its benefits extend to relieving everyday stress and discomfort, making it a natural and effective solution for enhancing overall well-being.

The AquaSolus range has been engineered with a deep understanding of hydrotherapy's restorative potential. By strategically positioning jets and optimising water flow, AquaSolus delivers targeted massage therapy to soothe sore muscles, reduce inflammation, and promote physical recovery. Whether used for rehabilitation or daily relaxation,

AquaSolus hydrotherapy provides a holistic approach to wellness that nourishes both body and mind.

Shoulder Jets

Our seats provide targeted shoulder massages. Perfect for relieving muscle tension, improve circulation, reduce stress, and ease chronic pain. Their soothing massage action promotes relaxation, enhances overall wellness, and supports recovery from physical strain, making them an ideal feature for a deeply rejuvenating hot tub experience.

Back Jets

Our HydroFlow back jets are thoughtfully engineered to target and massage the key muscle groups along your back, while avoiding direct pressure on your spine. The AquaSolus loungers feature six powerful jets aligned in parallel, precisely aimed at your core muscle areas for a deep, soothing experience. Each seat is designed to offer a unique jet formation, delivering a variety of massage sensations, but all focused on providing a full-back treatment with larger, more effective jets.

Leg Jets

Leg massage is often overlooked in a hot tub, even though our legs are constantly on the go. Our AquaLounge has been designed to provide a very penetrating massage directing jets onto your calf muscles. So, whatever your daily schedule brings, you can always relax with great leg therapy at the end of it by taking advantage of the AquaLounge.

Foot Jets

Reflexology is a non-invasive complementary health therapy that can be effective in promoting deep relaxation and wellbeing. For some people it's a very important requirement from a spa and our AquaSolus HydroBlaster foot jets do everything to simulate this experience.

These foot jets have 14 individual jets within them, all producing a powerful directed stream of water that will massage every part of your foot.

Aqua EverFrame: Unmatched Durability for Optimum Water Capacity

The AquaSolus hot tubs are designed to hold the optimum amount of water, ensuring the perfect balance for an exceptional hydrotherapy experience. This superior capacity demands a structural foundation that can withstand immense weight and stress, year after year.

That's why we've engineered the Aqua EverFrame with tubular stainless-steel construction, providing unrivalled strength and long-lasting stability.

Stainless steel offers significant advantages over traditional materials. Completely weatherproof and resistant to expansion, contraction, twisting, and bending, it holds firm in all climates. It won't rot or rust, and its innovative design allows for easier access when maintenance is required.

With a lifetime guarantee, the Aqua EverFrame exemplifies our commitment to top-tier quality and durability. You can relax, knowing your AquaSolus spa is supported by a frame built to last and designed to perfectly complement its optimum water capacity.

Aqua EverBase

The foundation of your hot tub is crucial, and Aqua EverBase is designed to excel in this role. Crafted from a single piece of tough, rigid ABS thermoplastic, this sculpted pan base locks in heat and keeps out moisture, serving as a thermal barrier against cold ground.

Reinforced with fiberglass, EverBase provides added strength and protection from pests. Its robust construction resists cracking, rotting, and rusting, making it suitable for any climate—hot, cold, or wet.

With EverBase, you benefit from a sealed, weatherproof base that combines functionality with superior aesthetics compared to traditional wood options. It's a vital component of your spa's insulation, ensuring both durability and energy efficiency.

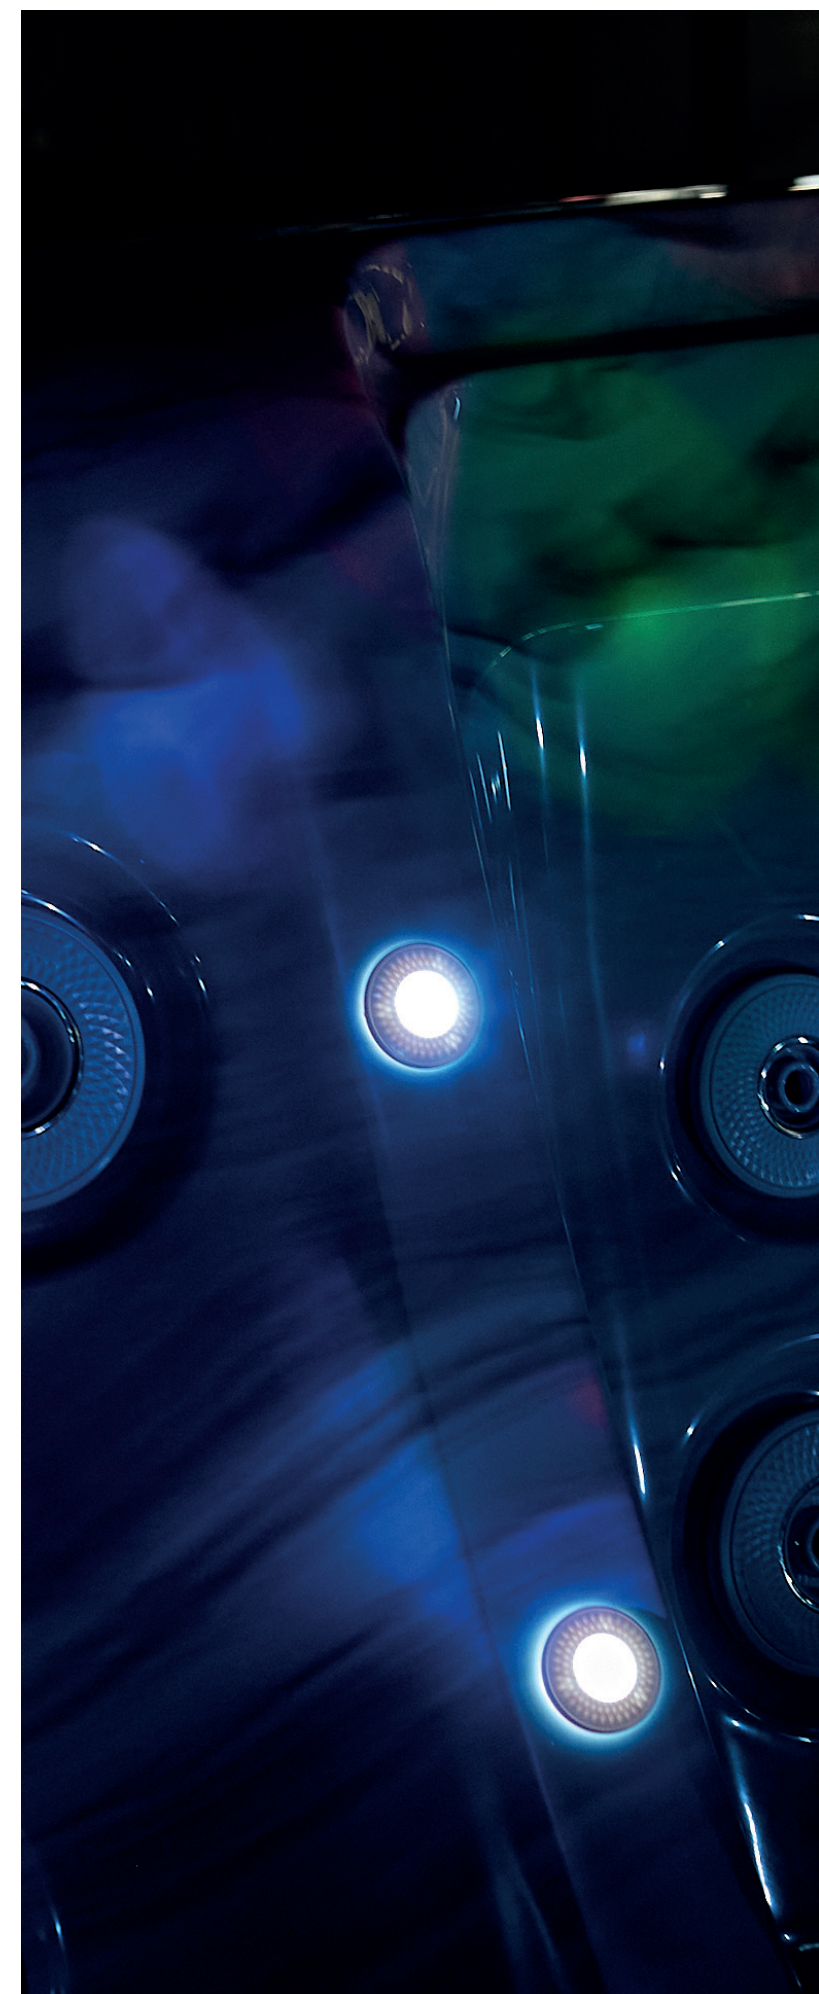

Aqua ChromoGlo

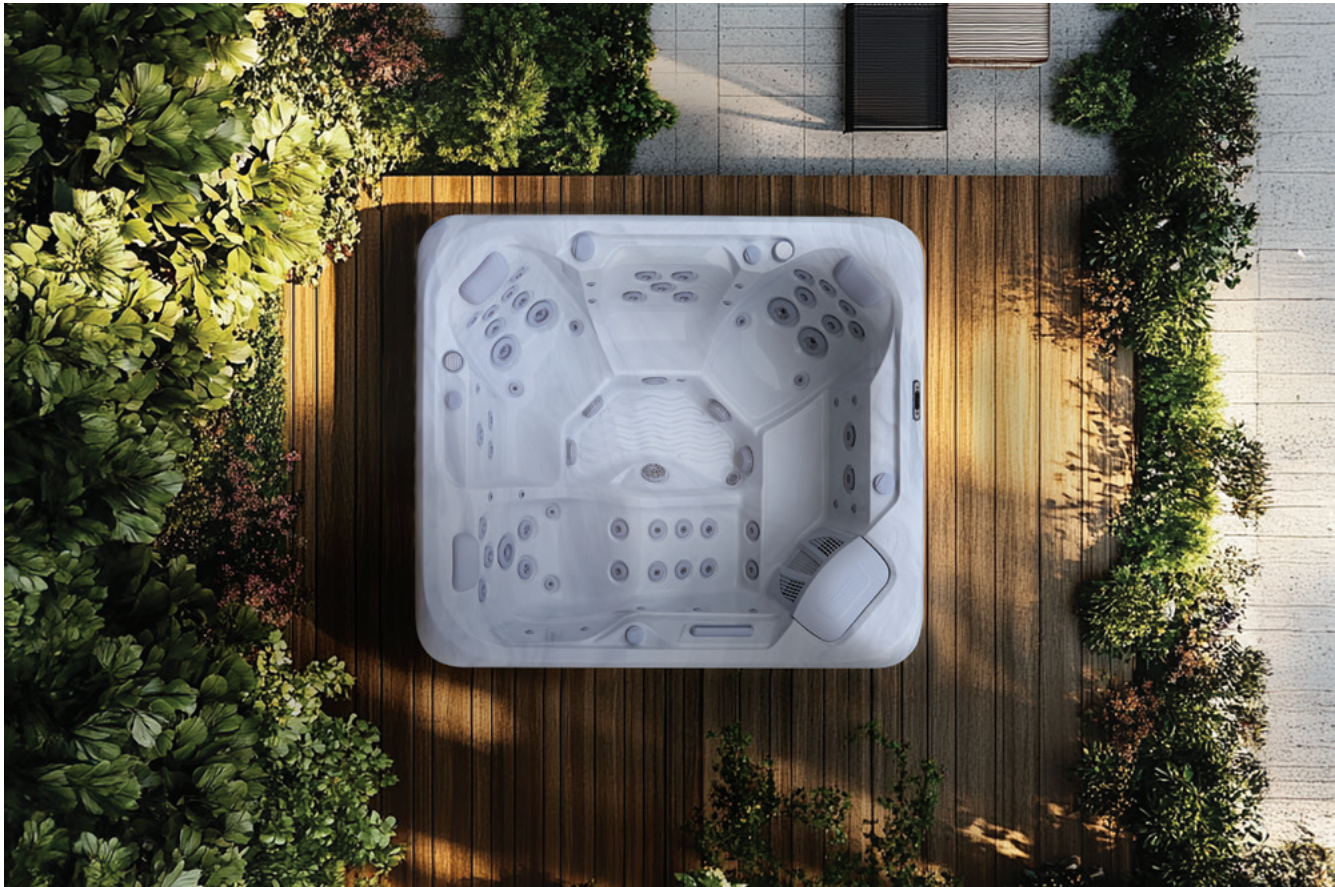

ChromoGlo enhances your hot tub experience by stimulating deeper relaxation through Chromotherapy, a proven form of light therapy. Different colors affect the body, mind, and spirit in unique ways, helping improve mood and overall well-being. This therapy is even used to support various medical treatments.

ChromoGlo features, multi-colored lighting around the spa and within some of our features. You can bathe in a single color or enjoy a soothing, gradual color shift, perfect for setting a romantic mood. It also serves as a safety feature, illuminating the seating for easy navigation. Additional lights in the control valves and water features above the waterline further elevate the relaxing atmosphere.

For a complete visual experience, EnviroLight adds exterior corner lighting panels that sync with the spa's interior lights, creating a beautiful, color-rich environment that extends into the surrounding landscape.

Exceptional massage & Easy water care

A Unique Back Massage

Discover the ultimate back massage with our AquaSolus spas. Our advanced moving jets create powerful streams of water that effortlessly glide along your back, providing a deeply relaxing and rejuvenating massage experience that stands out from the rest.

Designed for Comfort

Our sculpted seats are crafted to fit the natural contours of your body, ensuring superior support and relaxation. Each jet is strategically placed to target specific muscle groups, offering a comprehensive massage that soothes your neck, shoulders, back, wrists, calves, and feet. This thoughtful design promotes tension relief and enhances your overall sense of well-being.

Customised Massage Control

Enjoy the freedom to tailor your massage experience with our adjustable jet settings. Whether you seek a vigorous, energising massage or a gentle, soothing touch, you can tailor by manually adjusting the intensity to your liking. You can also direct water flow to particular jet groups or seats, giving you complete control over your spa experience.

Always Clean Water

Every drop of water in an AquaSolus spa is filtered constantly, even while you're enjoying it. Our filtration system, combined with high-flow, multi-layer filters, ensures thorough purification each time the water circulates. This state-of-the-art system guarantees that you experience the cleanest, freshest water possible, allowing you to fully indulge in your spa with complete confidence.

Swim Spa Features

Nonslip, Comfort Floor System

The Nonslip, Comfort Floor System provides both safety and comfort with its special blend of traction and cushioning. This flooring grips your feet during every movement, making exercises easier and more comfortable. It's applied to all entry and exit steps, as well as the entire floor area, ensuring stability and reducing the risk of slipping while adding a layer of comfort underfoot.

Flow – Turbine Water System

The Flow swim spa offers a smooth, powerful current with its advanced turbine system, mimicking open water swimming. With 9 speed settings, users can customize intensity for gentle or vigorous workouts. Designed for continuous, balanced flow, the quiet, efficient turbine ensures uninterrupted, endless swimming, making it perfect for fitness enthusiasts of all levels.

Hydrotherapy

Swim spas offer a soothing escape, perfect for easing muscle aches and finding mental relaxation. With adjustable temperature settings and strategically placed jets, you can enjoy the ultimate hydrotherapy experience tailored to your comfort. Whether you're looking to unwind after a long day or relieve tension, a swim spa provides the ideal environment to rejuvenate both body and mind.

Always Clean Water

Every drop of water is continuously filtered, even while you're using it. Our advanced filtration system, paired with high-flow, multi-layer filters, ensures that the water is thoroughly purified each time it circulates. This cutting-edge technology guarantees that you enjoy the cleanest, freshest water possible, allowing you to fully relax and enjoy your swim spa with complete peace of mind.

AquaSolus Collection

The Perfect Balance of Comfort, Power, and Luxury

Elevate your relaxation experience with the AquaSolus Collection, where sleek design meets cutting-edge functionality. Every feature is crafted to provide the ultimate in comfort, hydrotherapy, and sensory delight, making your time in the water an unparalleled retreat.

Slimline Hydrotherapy Jets – Precision Meets Power

Experience the luxury of our slimline hydrotherapy jets, offering a recessed design that blends seamlessly into your spa’s contours. These jets are available in three sizes, each designed to deliver powerful, tailored hydrotherapy:

3” Slimline Directional and Rotational Jets

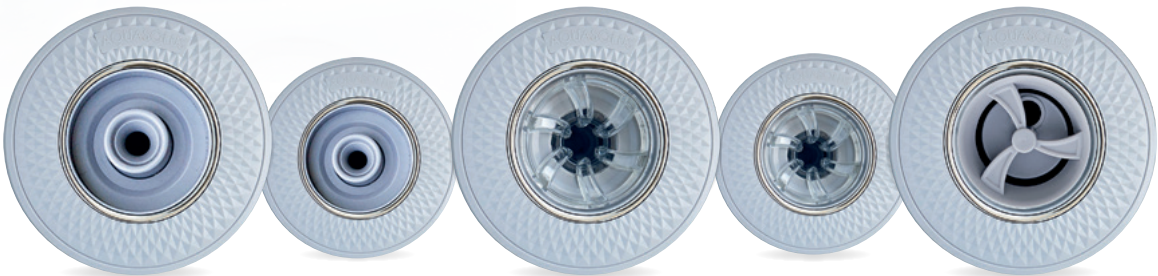

These compact yet powerful jets provide the perfect balance between targeted and soothing massage. The directional jets allow for precision targeting of specific muscle groups, relieving tension and promoting deep relaxation. The rotational jets, on the other hand, create a dynamic massage effect, stimulating circulation and relieving overall body stress.

4” Slimline Directional and Rotational Jets

Enjoy a deeper, more impactful hydrotherapy experience with the 4” slimline jets. The recessed design enhances comfort, while the directional jets focus pressure on key areas to alleviate soreness and muscle fatigue. The rotational jets gently rotate, offering a broader massage that soothes larger muscle groups, perfect for relieving post-workout tension.

6” Slimline Directional and Rotational Jets

For those seeking the pinnacle of relaxation, our largest 6” slimline jets deliver unmatched power. The directional jets provide intense relief, focusing on deep tissue massage, while the rotational jets offer a wider, more therapeutic experience, stimulating your entire body for a revitalising spa session.

Ergonomically Designed Headrests – Luxury in Every Detail

Our beautifully sculpted headrests, are designed to cradle your head and neck in perfect comfort. The ergonomic design ensures maximum support, allowing you to fully relax and let the soothing effects of the hot tub melt away any tension. Crafted to complement the aesthetic of your spa, these headrests are as visually stunning as they are functional.

Infinity Waterfall Fountain – A Stunning Centrepiece

Immerse yourself in the calming ambience of the Infinity Waterfall Fountain, where the gentle flow of water cascades seamlessly into your spa. This beautiful feature not only enhances the tranquil environment but also adds a touch of modern elegance to your AquaSolus hot tub, creating a multi-sensory experience that soothes both body and mind.

LED Lighting – Ambient Illumination for Any Mood

Bathe in the glow of our LED Light, designed to illuminate your spa, creating a mesmerising atmosphere. Whether you prefer a tranquil glow for evening relaxation or vibrant lighting to match your mood, this feature enhances your spa experience, turning each session into a visual delight.

Diverter Control – Personalised Power and Flow

Take full control of your spa’s power with the stunning Diverter Control. This sleek and functional feature allows you to effortlessly adjust the flow of water to any seating position, ensuring every jet delivers the optimal level of comfort and intensity exactly where you need it most.

Premium Audio Experience – Sound Like Never Before

Complete your luxury spa experience with our Premium Audio System, featuring an integrated speaker setup that delivers crisp, clear sound. Whether you’re unwinding to soft melodies or energising your soak with your favorite playlist, the high-quality audio elevates every moment in your AquaSolus hot tub.

Elevate Your Wellness Journey

Designed to keep you Active and Stress Free

Carefully positioned jets focus on key muscle groups, from your neck and shoulders to your back, calves, wrists, and feet. AquaSolus spas provide the perfect balance of buoyancy, warmth, and hydromassage, helping to accelerate muscle recovery and enhance performance during workouts and daily life. The soothing heat promotes better circulation, boosts flexibility, and releases endorphins to naturally relieve pain.

Ergonomically designed seating effortlessly adapts to your body, placing you in the ideal position for ultimate stress relief. Tailor your experience with personalised controls to allow you to precisely adjust the air and water blend, and direct water flow to specific jet groups and seating areas for a truly customised massage.

Lighting up your Experience

The AquaSolus hot tub features stunning LED lighting that enhances your spa experience, especially at night. With internal and external lights illuminating your soak, you can create a serene ambiance for relaxation. The innovative up and down lights on the corner panels provide a stylish touch while ensuring safety and visibility. Additionally, the cup holders cleverly double as illuminated speakers, adding to the luxurious atmosphere. This dynamic lighting system not only elevates the aesthetic appeal but also transforms your hot tub into a tranquil retreat, perfect for enjoying evening gatherings or peaceful moments under the stars.

Effortless Water Care

Your perfect hot tub experience begins with crystal-clear water that feels fresh every time you step in. Our innovative, low-maintenance filtration systems efficiently remove impurities, while accessories help reduce contaminants from your fill water, making water care hassle-free. Spend more time relaxing and less time on upkeep.

Our advanced purification system delivers clean, natural-feeling water that's easy to manage and extends its life. By utilizing cutting-edge technology, it ensures the purest water possible while promoting water conservation.

Every spa includes a quiet, dedicated circulation pump for continuous water flow, efficient filtration, and reduced energy consumption—providing a cleaner, more enjoyable hot tub experience.

Tune in to tranquillity

The AquaSolus hot tubs come equipped with an advanced Bluetooth music feature that elevates your relaxation experience. Stream your favourite tunes effortlessly from your smartphone or tablet, transforming your soak into a vibrant, entertaining retreat. The high-quality speakers (which also double up as cup holders) deliver clear, immersive sound, allowing you to unwind with your favourite playlists or podcasts. Whether you're hosting friends or enjoying a quiet evening, this feature enhances the ambiance, making every moment in your hot tub truly memorable.

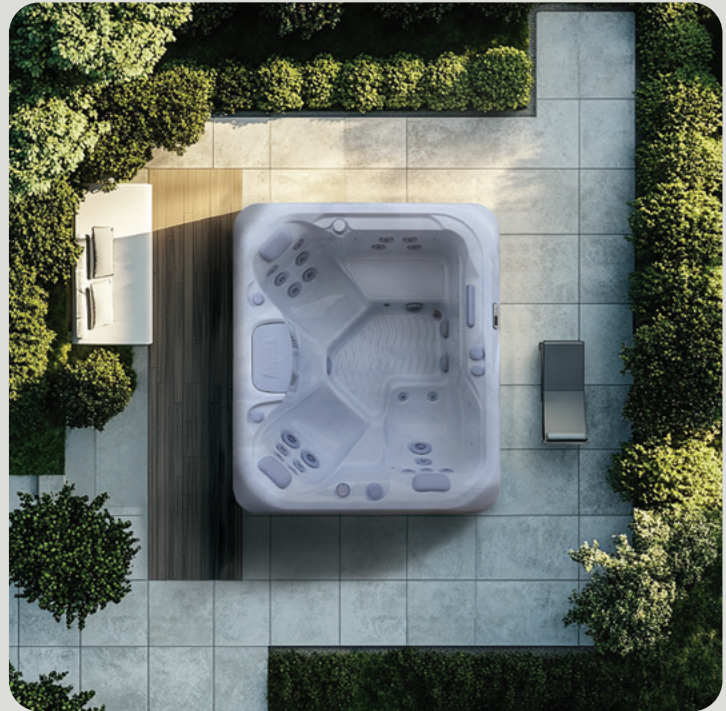

Series 1: AquaPure

Unmatched Quality, Performance, and Value.
With striking designs, distinctive massage options, AquaPure spas offer all the quality features you would expect from AquaSolus at great value.

Designed with Water, Simplicity and Nature in mind.

AquaPure is the embodiment of nature's simplicity. Designed for those seeking a calming, straightforward experience, this range focuses on the pure connection between water and wellness. With names like Brook, Cypress, Zephyr, and Cove, each model in the AquaPure range is inspired by natural elements,

offering gentle yet rejuvenating hydrotherapy for daily relaxation. AquaPure is perfect for anyone looking to escape into peaceful serenity in their own home, providing simplicity at its finest. All AquaPure hot tubs are 15 amp.

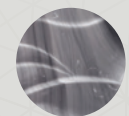

AquaPure

Brook

Inspired by the gentle flow of a small stream, the Brook hot tub provides a serene and refreshing escape. Its design encourages relaxation, with calming hydrotherapy jets that mimic the soothing flow of water, offering a perfect way to unwind after a busy day. Experience nature's tranquility in the comfort of your home.

Series 3: AquaLux

Our most advanced range yet.
AquaSolus Series 3 represents the pinnacle of spa design — blending luxury, innovation, and performance into one seamless experience.

With programmable hydrotherapy massage sequences, real-time water monitoring, and immersive lighting and sound, Series 3 is designed to redefine relaxation.

Crafted in Sterling Silver and Odyssey Grey acrylic finishes, complemented by a sleek single piece Lunar Grey cabinet, this is where design meets distinction.

AquaLux

Cascade

The Cascade hot tub takes its inspiration from the flowing power and grace of natural waterfalls. With two loungers and three seats, it was designed to create a shared space where couples, families, or friends can gather and relax together. Its name reflects the feeling of water in motion; refreshing, revitalizing, and endlessly soothing; capturing the essence of wellness found in nature's most calming streams.

AquaLux

Solstice

The Solstice hot tub draws from the symbolism of seasonal change, a reminder of the cycles of rest, renewal, and togetherness. With seven spacious seats, it was crafted as a social centerpiece where wellness and companionship come naturally. Much like the solstice marks a turning point in the year, this design encourages moments of transformation and shared joy under open skies.

Swim Spa Series

Built for performance.

The swim spa allows for a full-body workout by simulating the resistance of open water swimming, ideal for cardiovascular health and muscle toning.

This form of exercise is highly effective while being gentle on the joints, making it suitable for all fitness levels. Using a turbine system with 9 speeds, this swim spa is built for performance and ideal for athletes and professional swimmers as well as fitness enthusiasts.

Beyond the physical benefits, AquaSolus promotes mental wellness by providing a tranquil space to unwind. The calming environment of warm water, combined with soothing lights and sound options, helps reduce anxiety, improve sleep quality, and enhance overall mental clarity.

Swim Spa

Flow

The Flow swim spa brings the essence of natural rivers into your backyard with its innovative river jet technology. This system offers a unique counter-current experience, allowing you to swim against adjustable streams of water that mimic the feel of a flowing river.

Warranty overview

***Lifetime warranty on the shell structure of the spa:** AquaSolus warrants the structural integrity of the spa shell against water loss due to defects in material or workmanship.

***7 years warranty on the shell surface of the spa:** AquaSolus warrants the shell surface of the spa against blistering, cracking, and delamination.

3 years warranty on Control box and display module: AquaSolus warrants the display and the spa control box against defects in materials and workmanship. This warranty does not cover fuses, bulbs, and gaskets.

3 years on pumps: AquaSolus warrants the jet and circulation pumps against defects in materials and workmanship.

3 year warranty on plumbing: AquaSolus warrants the plumbing against leaks from fittings, pipes, drains, joints, internal plumbing, bonded parts, and jet housings.

3 year warranty on the cabinet of the spa: AquaSolus warrants the cabinet against cracking or peeling of the surface due to defects in material or workmanship. Fading and weathering of the surface over time are considered natural and are not covered under warranty.

3 year warranty on the ozone generator: AquaSolus warrants the ozone generator against defects in materials or workmanship.

3 year warranty on the audio system components: AquaSolus warrants the factory-installed audio components (power supply, speakers, wires, Bluetooth modules, etc.) against defects in materials or workmanship.

3 year warranty on LED lights: AquaSolus warrants the factory-installed LED lights against defects in materials or workmanship.

3 year warranty on the thermo cover: AquaSolus warrants the thermo cover against defects in materials or workmanship.

3 years warranty on plastic components: AquaSolus warrants the filter housing, pillows, diverters, waterfalls, and cup holders. Defects due to improper water chemistry are not covered.

3 years warranty on jets: AquaSolus warrants the jets against defects in materials or workmanship. This warranty does not cover jet failures due to lack of maintenance or poor water chemistry.

* Lifetime warranty period 10 years.

* Any damage found must be reported within 30 days with images. Any damage not reported and in time worsens maybe rejected
