

Jacuzzi®

2026 Swim Spa Collection

Imagine a place where relaxation
meets bold strokes.

Where floating gently in the water
releases you from the gravity of the day.

Where high-performance swims and low-impact
fitness take place every day of the year.

Where the Jacuzzi experience you know
and love takes on a whole new dimension.

Imagine a place that takes care of you.

It's all here in a Jacuzzi® swim spa.

Our story originated when Ken Jacuzzi, age 2, was diagnosed with rheumatoid arthritis. His father invented the world's first at-home pump to provide pain-relieving hydrotherapy.

From that moment forward, Jacuzzi has deepened its expertise in moving water, bringing joy to millions of homes around the world.

Jacuzzi brand products are designed to restore balance and heighten the joys and benefits of hydrotherapy. Our products are enjoyed in more than 100 countries and are manufactured by thousands of employees in five countries.

Built with the same care today

Through decades of extensive research and development, Jacuzzi has created breakthrough products that engage the senses, nurture the body, and restore the mind like no other.

Product and colors may vary.

A person is swimming in a Jacuzzi swim spa. The water is dark blue, and the person's head and arms are visible. The person is wearing a dark swimsuit. The background is a bright, overexposed area, possibly a pool deck or a bright sky.

What every swimmer needs

Jacuzzi® swim spas create the perfect conditions for the ideal swim. Get ready for a challenging, endless-swim experience that keeps you afloat and in place.

Powerfully controlled current

Creates a high-volume stream of water so you can easily swim in place without drifting out of your lane.

Predictable swim, every time

Offers the same conditions and tracks your swim, so you can focus solely on your technique.

Low turbulence

Ensures every stroke is perfect because it's met with a smooth current.

Engineered for peak performance

We leverage innovative swim technology and exercise physiology to deliver an invigorating and precise swim every time. Decades of expertise in moving water go into the design and construction of every Jacuzzi® swim spa.

Powerful pumps

To deliver the maximum amount of water evenly to both swim jets, our pumps push a high volume of water through oversized plumbing, creating a wide and powerful swim lane.

Synchronized swim jets

The swim jets minimize turbulence by accelerating the current without using air. The SteadySwim® buoyancy jets¹ add just the right amount of lift under your body, keeping you perfectly elevated during your swim.

Intuitive speed settings

Customize the water flow to sync with your speed, from a warmup to an intense swim. The 10-speed Swim Selector¹ is always at your fingertips to help you find your perfect pace.

Aquatic WaveBreaker™ design

Two unique contours work with the water intakes at the back of the swim spa. Together, they minimize waves bouncing off the side and into the swimmer.

Data tracking¹

Create user profiles for each swimmer and track distance, speed, resistance level, calories burned, and more.

¹ Varies by model

Product and colors may vary.

The power to own your swim

Drawing from our legacy of pioneering hydrotherapy, Jacuzzi has mastered the art of jet technology to create the best experience for every type of swimmer. We put control and customization at your fingertips, so you can be fully immersed in your swim.

Jacuzzi® PowerPro® PX swim jet
The wide-stream PX swim jets channel a high volume of water into a concentrated flow with an air-free stream that forms the optimal swim lane. Vertical blades evenly distribute water for a predictable swim.

Jacuzzi® PowerActive® AX swim jet
Contoured oval swim jets flatten the current for a smoother swim and create a shoulder-width swim lane. You can adjust the flow to personalize your swim.

Jacuzzi® PowerPlay® CX swim jet
The classic round swim jets create a simple swim lane that's perfect for playful moments and an easygoing exercise regimen.

SteadySwim® buoyancy jet¹
These jets elevate your body to help you stay afloat. Adjust the angle and flow to support your preferred swim position.

¹ The SteadySwim Buoyancy jet is included in the Jacuzzi® PowerPro® and Jacuzzi® PowerActive® swim packages.

When the ultimate swim ends,
legendary Jacuzzi® hydrotherapy begins.

Let it all soak in

For decades, Jacuzzi® hydromassage has stood apart as a distinctive and unrivaled experience. This is where heat, buoyancy, and our optimal massage all come together for your relaxation, joy, and well-being.

Heat
Dilates blood vessels to increase blood flow, delivering more oxygen to the muscles.

Optimal massage
Boosts circulation and releases endorphins, providing relaxation from head to toe.

Buoyancy
Creates weightlessness and 360° support, relieving pressure on joints, muscles, and nerves.

Heavy duty, light touch

Aqualibrium® produces the perfect balance of air and water. Jacuzzi® PowerPro® jets emphasize 360° air induction to provide a unique high-volume, low-pressure massage. These exclusive jets gently deliver a deeper, more powerful massage.

You do you

Everyone likes their massage a little different. Strategically placed Jacuzzi® PowerPro® jets target specific muscle groups with a completely tailored massage. Adjust the flow and intensity from each jet. It's the massage that's right for you.

NX

Targets the sensitive neck area with a highly focused stream to relieve tension and strain. Move the nozzle to personalize the massage direction.

FX

Exclusive spiral design focuses on smaller muscle groups with an energetic impact, stimulating pressure points in the shoulders, back, and feet.

MX

The original performance therapy jet that started it all. The MX includes a completely adjustable nozzle with a 60° range of focus, producing a bold, high-volume massage action.

RX

Delivers a full-coverage massage with a powerful kneading motion to relieve muscle tension, primarily in the middle and upper back.

Jets vary by model.

A new frontier in wellness

Another first from Jacuzzi—we have introduced Infrared and Red Light therapy across a full range of our wellness products, from saunas to swim spas and hot tubs. It works in harmony with hydrotherapy to soothe and rejuvenate beneath the surface.

IR

Check out all the benefits
of IR and Red Light therapy.

Rejuvenation meets relaxation

The rejuvenating powers of Infrared and Red Light therapy work together deep beneath the skin's surface to relieve pain, improve range of motion, and help you reach a state of mindfulness.

Backed by research

Substantial evidence supports the efficacy of IR and Red Light therapy to relieve pain.¹ To ensure safety, it's been tested by certified third-party Intertek® test laboratories.²

Relief where it's needed most

Low back pain is the leading cause of disability worldwide,³ so we strategically placed our IR and Red Light therapy where it can target deep tissue within the lumbar region of the lower back.

¹ Source: 2008 Cochrane Review

² The IR and Red Light device met the IEC 62471 Photobiological Safety Standard

³ Source: World Health Organization

● IR + Red Light

Please be seated

Rooted in our rich tradition of spa design, personalized comfort is always a top priority. The collection of seats in each Jacuzzi® swim spa facilitates full-body hydromassage, while balancing the flow to every seat for the best experience.

A

FX-IR Therapy Seat

Neck, shoulder, and back relief

A collection of FX jets combines full back and neck hydromassage with near Infrared and Red Light therapy targeting deep tissue within the lumbar region of the lower back. It's an unprecedented rejuvenating swim spa experience.

B

ProAir™ Therapy Seat

Relief right where you need it

Delivers the best of both worlds, pinpointing muscles along the neck and shoulders, while also providing relaxing hydromassage to larger muscles down the back.

C

Pro360 Therapy Wall™

Full-body relief and recovery

Stand up and lean into the Therapy Wall to get a 360° massage on your front, back, and sides. It's designed to target swimmers' key muscle groups, including pecs, abs, hip flexors, and quads. Use it to warm up or cool down after a swim. Available only on the J-14™ swim spas.

Each seat is sculpted with an ergonomic focus to cradle the contours of the body. Specialized Jacuzzi® PowerPro® jets, recessed for your complete comfort, are thoughtfully positioned to target key muscles.

RX Therapy Lounge

Comforting back, shoulder, leg, and foot relief

A ring of spinning RX jets targets key back and shoulder muscles to soothe stiffness and release tension, while neck jets add further relief. The lounge's calf jets knead and stimulate surrounding tissue. It's a key part of our highest performing hydromassage. The RX Therapy Lounge is available only on the J-19DT™ swim spa. All other Jacuzzi® PowerPro® and Jacuzzi® PowerActive® swim spas include the RX Therapy Seat.

The most beautiful water

All Jacuzzi® swim spas include advanced filtration and water care systems, so every swim feels as fresh as it looks. And caring for the water takes far fewer chemical additives than an in-ground pool. Pure, crystal-clear water—it's one more way we strive to bring the natural joys of wellness to people everywhere.

A holistic approach to water care

Every Jacuzzi® swim spa includes filtration and water treatment technology to deliver exceptional cleaning¹ power and reduce the need for chemical sanitizers.

4-stage² filtration process

Stages 1 and 2

The skimmer and unique mesh ProCatch™ bag work together to clean the water surface and trap large debris for easy removal.

Stages 3 and 4

This exclusive system features two 60 sq ft ProClear® filters connected directly to a ProStream® pump that filters an incredible 35+ gallons per minute.

Clean water, less effort

Harness the power of active oxygen for a hands-free approach to water care. **ClearRay Active Oxygen®** system breaks down and neutralizes contaminants.³ It works harder to clean the water longer.

¹ Clean is defined as the removal of microscopic debris (down to 3-micron level, varies by model) from the water.

² Stages of filtration may vary by collection.

³ Contaminants include dirt and grit.

High tech meets high touch

We believe cutting-edge technology should be intuitive and personalized. Our exclusive SmartTub® system is like a remote control and command center that lets you monitor, operate, and protect your Jacuzzi® swim spa.

Use hands-free voice commands with your smart device to set temperature, adjust jets, and more.

Learn more about SmartTub, including enhanced 24/7 monitoring.

Control

You can adjust temperature, jets, and lights, and lock down your swim spa to prevent usage while you're away. Set up your own automated schedule, receive alerts, and check your swim spa status, whether you're at home or on the go.

Convenience

With SmartTub, you can monitor and control your swim spa and track energy usage from anywhere in the world. Plus, SmartTub performs daily diagnostic checks to ensure peak performance. It even includes a swim workout video library.

Energy efficiency

Smart Heat Mode optimizes savings by using your swim spa in the most energy-efficient way possible. It can reduce standby power by up to 25% and has a Vacation Mode that minimizes water heating while you're away.

Peace of mind

SmartTub sends automatic alerts and maintenance reminders if your swim spa needs attention and can detect power outages to protect against freezing or overheating. If any issue arises, SmartTub alerts your Jacuzzi dealer, who can get in touch with you. No other system offers this level of high-touch service.

Proven durability, strength, and performance

Worry-free relaxation is what we’re known for. Jacuzzi® swim spas are built with premium materials and expert construction to withstand the elements and run reliably with little maintenance.

A

Galvanized steel frame
Specially designed structure with integrated side gussets provides years of durable shell support.

B

Programmable filtration
Optimize water filtration to suit your needs or operate during off-peak hours for energy savings.

C

ProFusion™ shell
Highest quality acrylic, a bonded vapor barrier, and a resin composite provide superior durability, even in extreme temperatures.

D

Swim bar¹
Grab the bar to catch your breath, get a feel for the current, or perfect your kicking technique.

E

Illuminated waterfall¹
A cascading stream of water with soothing sounds creates a calming ambient atmosphere.

F

Multilayer insulation
Three layers of insulation prevent heat loss by surrounding the spa and reflecting heat back to the shell and plumbing.

G

Durable ProPolymer™ base
The foundation eases installation, is impervious to the elements, and resists moisture.

Product and colors may vary.

Size up your swim spa

Bring legendary Jacuzzi® hydrotherapy together with an all-season pool in your own backyard. With a wide range of sizes to fit your space and three levels of swim tech for all types of swims, you're sure to find the spa that's made for you.

Find your flow

Jacuzzi® swim spas offer three distinct swim packages, each geared to the type of swim you want—from casual, refreshing swims to high-performance endurance training.

Jacuzzi® PowerPro® swim package
Built for the strong swimmer, with our most powerful swim current and two buoyancy jets to help support the swimmer.
—
Features 10 levels of customization to suit every type of swim workout.
—
Includes our top-of-the-line hydrotherapy package for a swimmer’s recovery needs.

Jacuzzi® PowerActive® swim package
Versatile fitness solution—perfect for an aerobic session, casual swim, or resistance training.
—
Personalize workouts by adjusting the swim jets and buoyancy jets.
—
Includes our most advanced hydrotherapy package to relax and recover.

Jacuzzi® PowerPlay® swim package
Stay fit with a jog or swim in this entry-level swim package.
—
Designed for unwinding and self-care.
—
Kids can play and swim while adults unwind and reap the benefits of authentic Jacuzzi hydrotherapy.
